

E32 Term 1

Reflection

My favourite part of the term was maths, science and growth mindset lessons, narratives and visualising. Some fixed mindset words are 'I can't do it', 'it is too hard'. A person with a growth mindset will say 'is this my best work?' and 'I am going to use some strategies that I have learnt'. In maths we use a number line and a blank number grid. We do closed and open questions and guess my number. In science we've learnt about life cycles.

-Bianca

Some of the things that we have done this term are:

Growth mindset, parts of the brain, frog life cycle, writing about me, rainbow facts, flower life cycle, rocket reading, doubles, visualising and making connections. **-Anikesh**

This term I have liked doing our maths mental routines on the blank hundred grid because I like doing maths.

This term I liked doing P.E. because sometimes we do really fun things.

I liked doing the Kelso's Wheel because Kelso is a frog and I like frogs. I also liked doing the life cycle because frogs are the best animals.

I liked doing the doubles because it is so fun and I like it because it is maths.

-Khang

We have learned about Kelso's Wheel. It is a poster that helps you solve small problems.

-Blake

We learnt about rainbow facts because it helps us to learn our numbers. We ran the first gathering and our class got to speak but not all of us talked. **-Rhys**

Rocket Reading has 5 groups, Asteroids, Meteorites, Shooting Stars, Comets and Satellites. We do Rocket Reading on Tuesday, Wednesday and Thursday. **-Jasper**

This term we have learnt the secret code in Maths. We are also reading Premier Reading Challenge books. We even do Rocket Reading. We have Kelso's Wheel. This helps us to make good choices. We have class agreements, our class rules. We have learnt about proper nouns and common nouns. We've learned about 2 life cycles, frogs and plants. We've learnt about the brain. We've got an amygdala, cerebrum, cerebellum, hippocampus, prefrontal cortex and neurons. **Zainab**
