School Values

Pride Cooperation Quality Respect

Welcome Back!

Welcome to Term 4. We look forward to a busy term of learning and fun in TR10. This term students will enjoy Swimming, Sports Day and an End of Year concert! Please check Skoolbag regularly for important updates.

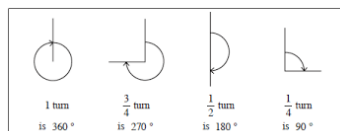

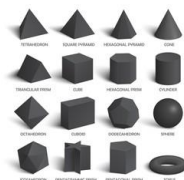

English

This term students will be focusing on the text types: Procedure and Recount. We will be looking closely at the structure, grammar and language features of these text types and further focus on vocabulary and text organisation to improve student writing. We will be teaching spelling, grammar and punctuation through the Jolly Phonics/Grammar Program. Students will work in small groups and with the teacher during Guided Reading to improve reading comprehension.

Mathematics

We will continue to develop students' skills in Mathematical Understanding, Fluency, Problem Solving and Reasoning by exploring various calculating, counting and mental strategies to help solve real life problems. Our focus for Term 4 will be Shape and Geometric Reasoning. Students will make models of 3D objects and describe their key features. They will measure angles and compare angle sizes in everyday situations.

Humanities and Social Sciences

In Term 4 students will focus on History, learning about different Celebrations and commemorations in places around the world and those that are observed in Australia, with a focus on Christmas and New Year's Eve.

Science

This term we will be focusing on Chemical Science. Students will explore changes of state between solids and liquids which can be caused by adding or removing heat. They will design and conduct an experiment which will test a hypothesis they form and share their findings with the class.

Child Protection Curriculum

In Term 4 we will be focusing on Recognising and Reporting Abuse and Protective Strategies. Students will explore strategies to manage physical, social and emotional change.

Science, Technology, Engineering and Math (STEM)

Our STEM activities are integrated across the curriculum. The students will develop their problem-solving skills through designing, making, modifying and appraising depending on the student's interests and inquiry questions about the given topic.

In Technology we will identify and explore a range of digital systems and recognise different types of data and how the same data can be represented in different ways.

Specialist Subject areas:

This year specialist subjects are The Arts, Japanese and Health and Physical Education (P.E). Please see specialist subjects' newsletters for more information. Each week students will participate in two PE lessons, two Japanese lessons and one Arts lesson.

TR 10	
Monday	11:15am PE
Tuesday	2:15pm Japanese
Wednesday	10:10am Arts
Thursday	2:15pm Japanese
Friday	9:25am PE

We look forward to working in partnership with families and students to achieve successful learning outcomes as well as supporting student wellbeing.
