

YEAR 2

LEARNING OVERVIEW

Important Dates

TERM 4

Welcome back! We can't believe it is October already. Swimming week was a great success and the students gained lots of skills to keep them safe around water. We are looking forward to a great term of learning and supporting students to prepare for year 3.

- 14th-18th October - Swimming
- 23rd October - Opening of SW new Building
- 27th October - Matsuri on Mobara Celebration
- 28th October - **Student Free Day**
- 11th November - Remembrance Day Gathering
- 5th December - End of Year Family Picnic
- 10th December - 2025 Class Visits
- 11th December - Reports go home
- 13th December - Last day of Term, 2pm dismissal

MATHEMATICS

Students will explore the connection between repeated addition and multiplication. Arrays will be used to represent multiplication and we will explore division through equal grouping.

Students will solve money transaction problems using calculation strategies taught.

Students will classify shapes by identifying their features and using spatial vocabulary. We will use directional language to follow pathways and use 2D representations of familiar places.

Mawson Lakes School's primary method of communication is the Audiri app. Notifications and reminders of events are sent regularly via the app.

SCIENCE

CHEMICAL SCIENCE

Students will recognise that materials can be changed physically without changing their material composition and explore the effect of different actions on materials. Students will write and follow scientific procedures.

ENGLISH

We will continue with our Phonics and spelling program this term. The program follows a clear scope and sequence that responds to students progress.

Once introduced to a new phoneme and any rules that apply, students begin reading and writing the grapheme in words, sentences and short texts.

This term the text type we will focus on is procedure. We will explore the structure and different contexts when they are used eg. recipes and science experiments. We will also review the text types taught throughout the year.

HISTORY

We will explore how technological developments have changed people's lives at home and in the ways they worked, travelled and communicated.

SPECIALIST LESSONS

Please see the Physical Education, Japanese and Arts overviews provided by the specialist teachers.

HEALTH

We will continue learning about regulating our emotions through our Zones of Regulation program. Transitioning to year 3 is often a big change for students and they may identify having a range of feelings. Supporting them with strategies to manage these emotions will be a focus this term.

During our Child Protection Curriculum lessons we will discuss our body and privacy. Students will consolidate strategies to keep safe and the importance of our trust network.
